

FOUR GOLD AWARDS

for Environ Skin Care

Press Release - South Africa July 2023

On Thursday, July 13, Environ Skin Care collected four prestigious GOLD awards, distinguishing the innovation and quality of Environ products against the top industry nominees in Medical Beauty.

The Greece Medical Beauty Awards 2023 recognise the significant advances in the field of health, beauty and anti-ageing in terms of professional services and treatments. Environ's worldwide recognition by the highly esteemed judging panel of Medical Professionals demonstrates the growing strength of the Brand as well as the extraordinary legacy of Environ's Beautiful Science and leadership in skin health.

"The Medical Beauty Awards is a very important organisation because developments in products and technology are very fast and must be done every year to be able to evaluate in a correct way what is offered to us both as doctors, but also the services that we respectively offer to our clients. This way, the Medical Beauty Awards presents the best products, the best machines, the best services and practices applied in Greece in the field of health, beauty and anti-ageing", says Lia Papadavid, Vice-President of the Judging Panel, Professor of the Medical School of the University of Athens, and Director of the 2nd Clinic of Skin and Venereal Diseases at the "Attikon" University General Hospital.

ENVIRON PRODUCTS AWARDED GOLD

BEST ANTI-AGEING PRODUCT

Focus Care Youth+[®] 3DSynergé™ Filler Crème

With over forty-five million peptide ingredients reviewed and extensive

scientific research spanning over seven years, Dr Des Fernandes (world-leading Plastic Surgeon, Founder and Scientific Director of Environ Skin Care) developed 3DSynergé™ Filler Crème – a multi-award winning formulation, inspired by Aesthetic Dermal Filler Techniques. "As we age, it is natural for the skin to lose fat in the dermis as well as hyaluronic acid. What many people need is to improve the cushion of fat in the skin and boost the hyaluronic acid status to make it look like the skin has been "re-inflated". Environ's R&D team aimed to develop a topical cosmetic formulation that can be used to improve the appearance of smoother, firmer and naturally full-looking skin."

– Dr Des Fernandes, Environ Founder & Scientific Director

BEST CELLULITE PRODUCT

Body EssentiA[®] Contouring Cream

23 years in the making, this revolutionary multi-award-winning Environ innovation is based on

highly specialised ingredient science to visibly smooth, firm, tighten and reshape the appearance of dimpled, unevenly textured, and lax skin with powerful 3-dimensional contouring effects.

BEST MASK

Focus Care Youth+[®] Revival Masque

Globally acclaimed as the iconic "Face Lift in a Jar",

Environ's Revival Masque is an iconic product that is trusted, recommended and personally used by Skincare Professionals around the world. This dynamic masque is specifically formulated with a revolutionary combination of Lactic Acid, Mandelic Acid and Asiatic Acid, which helps the skin to look younger, firmer, smoother and more radiant.

BEST NIGHT CARE PRODUCT

Focus Care Youth+[®] Serience™ Night Serum

This multi-award-winning advanced overnight booster is a

pioneering skincare innovation based on advances in neuro-cosmetic science. Serience™ Night Serum combines specialised neuropeptide ingredients that holistically target and counteract the damaging long-term effects on skin health and youthfulness due to high concentrations of stress hormones.

ENVIRON PROFESSIONAL FOCUS-ON FILLER FACIAL TREATMENT SCOOPS SILVER AWARD FOR BEST INNOVATION NON-INVASIVE TREATMENT

Award-winning technologically advanced facial protocol combines the power of Environ’s Electro-Sonic DF Technology with a powerhouse professional formulation to visibly smooth lines and restore a rejuvenated, plumped youthfulness to the skin’s appearance. This 30-minute intense facial treatment is recommended as a non-invasive alternative or complementary treatment to Dermal Fillers.

Quote by Val Carstens

“For over 30 years, Environ has remained at the forefront of skincare innovation with revolutionary product formulations and pioneering skincare technologies that have been proven to make a real, lasting difference to skin. As pioneers of professional skincare treatments, Environ continues to push the boundaries of skincare therapy, to innovate and to develop more effective ways of delivering the best results for modern-day consumers and their skin concerns.”

ABOUT ENVIRON SKIN CARE

Environ is a globally recognised and respected Professional Skin Care brand that is built on science, beauty and care. Environ believes that skin has a life and that vitamin A is the “oxygen” it needs to look beautiful and healthy for life. It is for this reason that the brand actively pursues skincare science to skillfully and consistently develop scientifically researched products that work with skin.

Environ was founded in 1990 by internationally acclaimed plastic surgeon Dr Des Fernandes. The introduction of vitamin A into skincare formulations was a ground-breaking development in skincare. Dr Des Fernandes, rated amongst the top five plastic surgeons in the world, was a pioneer in this field in the 1980s. He was the first to use vitamin A in high enough doses that help counteract the harmful effects of the environment, pollution and stress to create radiant, visibly improved skin.

Dr Des Fernandes’s sister (Environ’s Group Chairman), Val Carstens, led the development of the company, which today boasts over 140 products available in more than 70 countries worldwide. Since founding Environ in 1990, vitamin A has become the cornerstone ingredient in the Environ skincare philosophy. It is an essential skin nutrient that has to be replenished every day for skin to appear healthier and more resilient. Environ’s unique and highly effective Vitamin STEP-UP SYSTEM® helps skin to become gradually more comfortable with increasing dosages of vitamin A and other ingredients, thereby reducing the likelihood of a skin reaction. It is for this reason that Environ Skin Care products are recommended by trained Skincare Professionals.
